Germany

Year built: 2006  
Furniture: **early bird**,  
**ambition**, **activation**

The office building in the harbour is reminiscent of historical warehouse buildings. In PKF, an auditing company, 100 **ambition** workstations as well as many **early bird** swivel chairs and 400 **activation** rollfront cabinets were used. When the tables and containers were being planned, numerous special solutions were created.

Special design feature of the furniture: all the components such as tables, cabinets, raised surface tops and mobile containers were created using the grid pattern 900 x 450 mm. The aim was to be able to interlace all the elements. Here, is a workstation with **ambition** / featuring the **sira** type of frame and a rolling cabinet with special dimensions. Photos: Sedus

Cupboard elements can also be used as a meeting point due to the raised surface set on top. All the cupboards and desks are made of beech with decorative white aluminium features.

All desks have a special opening for floor lamps (Spectral). Photos: Sedus
