

## rbb Rundfunk Berlin-Brandenburg, editing and broadcasting complex Architecture: Fehr + Partner, Berlin

Rundfunk Berlin-Brandenburg  
Masurenallee 8-14  
Berlin  
Germany

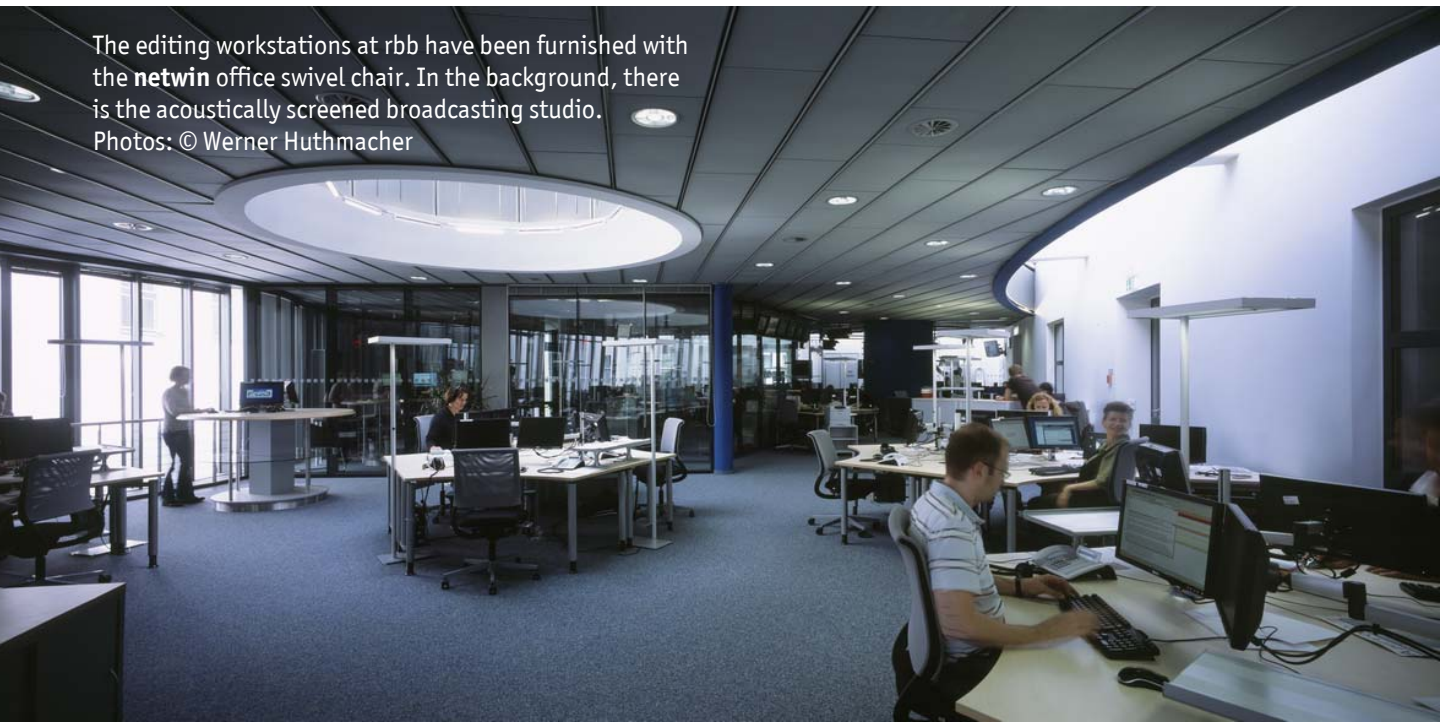

Completed: 2008

Products:  
**netwin**

For rbb, architects Fehr + Partner planned a 700 m<sup>2</sup> extension made of steel and glass. The new editing and broadcasting building accommodates broadcasting and production studios, reporter boxes and a television news area. Ninety editing workstations are spread over three floors. The new building means that the entire editorial team and the studios are now under one roof.

The editing workstations at rbb have been furnished with the **netwin** office swivel chair. In the background, there is the acoustically screened broadcasting studio.
